Have you heard?

The WSIB now offers epost Connect™, a Canada Post service.

This new feature is meant for employers to share their business records and financial documents with the WSIB for audit purposes in a safe, secure and trusted environment.

So how does it work?

When you receive an Audit notification letter, you'll also receive an option to participate in epost Connect.

You provide a valid email address to your auditor and an epost Connect notification is sent back to you.

Register for epost Connect at www.canadapost.ca/ connect, then you'll be able to access your profile 24/7, meaning you can instantly upload documents at a time that is convenient to you!

Your auditor will review the information and contact you.

Auditors will automatically receive a notification alert that your message has been delivered.

That's it. Of course our other methods of sending information are still available, epost Connect is just another way the WSIB is working to serve you better.
